

BootHop

Peer-to-Peer Delivery Marketplace

Complete Public and User Page Reference

August 2025 | Confidential

This document provides a complete reference of all pages and routes on www.boothop.com. Each entry shows the URL, who it is for, what it does, and key functionality. Use this as an operational guide for the team.

SECTION 1 - PUBLIC MARKETING PAGES

/	User	Homepage: Landing page with live journey stats, how-it-works overview, role switcher (Send / Travel), testimonials, and sign-up call-to-action. <i>Entry point for all visitors. Showcases the BootHop value proposition.</i>
/how-it-works	User	How It Works: Step-by-step visual explainer of the full peer-to-peer delivery process from posting a request to delivery confirmation. <i>Aimed at first-time visitors who need to understand the model.</i>
/pricing	User	Pricing: Transparent pricing page showing service fees, commission structure (5%), and example cost breakdowns for senders and carriers.
/about	User	About BootHop: Company story, mission statement, founding team profiles, and UK registration details.
/contact	User	Contact Us: Contact form, email address, phone number, and WhatsApp quick-link for direct support.
/help	User	Help Centre: FAQ library covering cancellations, refunds, disputes, KYC, and customs for both senders and carriers.
/guide	User	User Guide: Detailed written guide on using the platform end-to-end including tips, customs advice, and safety best practices.
/trust-safety	User	Trust and Safety: Explains KYC verification, compliance checks, escrow payment protection, and how BootHop keeps both parties safe.
/carrier-agreement	User	Carrier Agreement: Full legal agreement that all carriers must accept before carrying goods. Covers liability and prohibited items.
/edi-policy	User	Equality and Diversity Policy: Public-facing equality, diversity, and inclusion policy statement.
/terms	User	Terms of Service: Full platform terms and conditions governing use of BootHop by senders and carriers.
/privacy	User	Privacy Policy: GDPR-compliant privacy policy explaining data collection, retention, third-party sharing, and user rights.
/cookie-policy	User	Cookie Policy: Details cookie categories used on boothop.com and consent management.

SECTION 2 - AUTHENTICATION AND ONBOARDING

/login	User	Login: Email-based OTP login. User enters email, receives a 4-digit and 1-letter code, verified without a password. <i>Uses custom JWT session cookie (boothop_session), not Supabase Auth.</i>
/register	User	Register: New user registration form collecting name, email, phone, and role. Sends OTP verification email.
/verify	User	Verify OTP: OTP entry page. User types the code received by email to complete login or registration.
/intent	User	Choose Your Role: Post-login screen asking "Do you want to Send or Travel?" Routes user to the appropriate dashboard.

/start	User	Quick Start Wizard: Multi-step form to specify role, route, item size, date, and budget. Creates a draft request or journey.
--------	------	--

SECTION 3 - SENDING ITEMS (HOOPER FLOW)

/send	User	Send an Item Landing: Marketing landing for senders with testimonials, cost estimate, and quick-start button.
/send/uk-same-day	User	UK Same-Day Delivery: Landing page for UK domestic same-day delivery requests. SEO-targeted.
/send/uk-to-europe	User	UK to Europe Delivery: Landing page for UK-to-Europe route requests. Highlights customs advice.
/send/working-away	User	Working Away Delivery: Targeted at professionals working abroad who need items sent from home.
/send/student-delivery	User	Student Delivery: Targeted at students needing items sent to university cities.
/send/business-urgent	User	Business Urgent Delivery: Landing for businesses needing same-day or next-flight urgent delivery.
/send/[cityroute]	User	City Route Landing (Dynamic): SEO pages for specific city pairs e.g. /send/london-to-lagos. Shows live journey availability.
/requests/create	User	Create Delivery Request: Full item declaration form with description, dimensions, weight, value, and customs declarations. <i>Hoopers use this to post what they need carried.</i>
/requests	User	Browse Requests: Marketplace of open delivery requests. Booters browse, filter by route and date, and claim a request.
/hooper-dashboard	User	Hooper Dashboard: Sender control centre showing active matches, pending requests, delivery history, and spending summary.
/checkout/[matchId]	User	Payment Checkout: Secure payment page. Sender submits payment details. Funds held in escrow until delivery confirmed. <i>Manual escrow model - no Stripe payment processing.</i>
/payment/success	User	Payment Confirmed: Confirmation screen after payment submission. Shows next steps and links to the match detail page.

SECTION 4 - CARRYING ITEMS (BOTOER FLOW)

/journeys	User	Live Journeys Marketplace: Browse all active traveller journeys. Filter by route, date, weight capacity, and price.
/journeys/create	User	Post a Journey: Form for travellers to post their upcoming trip with route, dates, weight, price, and item restrictions. Includes inline AI route compliance check that fires automatically for international routes.
/botoer-dashboard	User	Botoer Dashboard: Carrier control centre showing posted journeys, active deliveries, earnings summary, and KYC status.

SECTION 5 - MATCH AND DELIVERY FLOW

/matches/[id]	User	Match Detail: Central hub for a confirmed match showing status timeline, chat link, KYC progress, declaration status, seal QR code, and delivery pin. <i>Status: matched > agreed > committed > kyc_pending > active > completed.</i>
/matches/[id]/declare	User	Item Declaration: Customs declaration form with item categories, prohibited items checklist, value declaration, and legal acknowledgement. <i>Required before payment can be released.</i>
/matches/[id]/inspection	User	Carry-On Inspection: Carrier confirms physical inspection of the item before accepting: packaging, description match, no prohibited items.
/matches/[id]/seal/print	User	Print Seal / QR Label: Generates a printable QR-code seal for the package. Scanning at delivery confirms handover.
/messages	User	All Messages: Inbox listing all active match conversations. Phone numbers and emails are filtered until payment is confirmed.
/messages/[matchId]	User	Match Chat: In-app messaging thread between sender and carrier. Content-filtered to keep communication on-platform.
/track/[matchId]	User	Live Tracking: Real-time delivery map showing carrier location, route history, and delivery event timeline.
/commit	User	Commit to Delivery: Carrier confirms they have accepted the item and are committed to completing the delivery.
/confirm	User	Confirm Delivery: Both parties confirm the item has been handed over. Triggers escrow release once both confirm.
/ratings/create	User	Leave a Rating: Post-delivery star rating and review form. Both sender and carrier rate each other after completion.
/share	User	Share BootHop: Referral sharing page with personalised link, social share buttons, and referral tracking.

SECTION 6 - COMPLIANCE AND SAFETY

/ai-check	User	AI Safety Assistant: Free tool to check if any item can be carried on a specific route. Claude AI checks customs rules, airline restrictions, and BootHop policy in real time. <i>Returns PERMITTED / RESTRICTED / PROHIBITED / REVIEW_REQUIRED. Flags admin by email on review cases.</i>
/kyc	User	KYC Overview: Explains the identity verification requirement, what documents are needed, and why it is required for international deliveries.
/kyc/[matchId]	User	KYC Verification: Stripe Identity-powered ID verification flow tied to a specific match. Carrier completes selfie and document check.
/kyc/video	User	KYC Video Verification: Alternative video-based identity verification for carriers who cannot complete the standard flow.
/customs	User	Customs Guide: Plain-English guide to UK customs, import duties, prohibited items, and declaration requirements.

/customs/duties	User	Duty Calculator: Interactive tool to estimate import duties and taxes for common item categories across popular destination countries.
/carrier/accept	User	Accept Carrier Agreement: One-click page for carriers to formally accept the Carrier Agreement before their first delivery.

SECTION 7 - ACCOUNT MANAGEMENT

/dashboard	User	Main Dashboard: Smart dashboard showing the most relevant content based on user role - pending matches, open requests, journey listings, and recent activity.
/profile	User	My Profile: Edit name, phone, photo, notification preferences, and view verification status.
/delete-account	User	Delete Account: Account deletion request page requiring confirmation. Triggers GDPR-compliant data erasure.
/delete-data	User	Delete My Data: GDPR right-to-erasure request form. Submits a data deletion request without full account deletion.

SECTION 8 - BLOG AND CONTENT

/blog	User	Blog Home: BootHop blog hub listing all articles covering customs, delivery tips, and travel logistics guides.
/blog/customs-clearance-services	User	Blog - Customs Clearance: SEO article explaining customs clearance services and how BootHop simplifies the process.
/blog/small-business-cross-border-ship	User	Blog - SME Shipping: Guide for small businesses on cost-effective cross-border shipping using peer-to-peer delivery.
/blog/on-board-courier-time-critical-l	User	Blog - On-Board Courier: Article on time-critical on-board courier logistics and how BootHop serves this use case.
/blog/[slug]	User	Blog Post (Dynamic): Dynamic blog post page. Fetches content from the CMS by slug. Supports structured article content.

SECTION 9 - FLIGHTS AND TRAVEL

/flights	User	Flight Search: Flight search and browse page showing upcoming flights on popular routes relevant to BootHop journeys.
/flights/[route]	User	Route Flights (Dynamic): Shows all flights on a specific route e.g. /flights/london-lagos. Helps travellers plan delivery trips.
/flights/airlines/[code]	User	Airline Page (Dynamic): Airline-specific page showing routes, baggage policies, and BootHop compatibility for that carrier.
/flights/airports/[code]	User	Airport Page (Dynamic): Airport information with terminal details, customs notes, and active journeys departing from that airport.

SECTION 10 - UTILITY AND MISC

/open	User	Deep Link Handler: Handles universal deep links redirecting users from email or external sources into the correct in-app page.
/open-file	User	File Open Handler: Handles opening shared BootHop files or documents passed via external link such as seal QR codes.
/watch	User	Watch / Media: Video content or live stream page for BootHop promotional or tutorial content.
