

BootHop

Ship Anything. Anywhere. Anytime.

Where We Are Today -- August 2025

Prepared for Omobola Famutimi and Dotun Asekun

Hi Omobola and Dotun,

Here is a plain-English snapshot of what BootHop is today, what is built and live on www.boothop.com, and what services are available. No technical detail -- just what you need to know as co-founders to talk about the product confidently and understand where we are.

WHAT IS BOOTHOP?

BootHop is a peer-to-peer delivery marketplace based in the UK. It connects two types of people:

HOOPERS -- people who need to send something (a parcel, a gift, food, documents, electronics) from one city or country to another.

BOOTERS -- travellers who are already flying or travelling on that route and have spare luggage space. They agree to carry the item and earn money for it.

Instead of paying expensive courier fees, a Hooper pays a Booter directly. BootHop handles the matching, the safety checks, the payment, and the paperwork. We take a small 5% fee from each transaction. The platform is live at www.boothop.com right now.

THE JOURNEY IN 6 STEPS

- STEP 1 -- Hooper posts what they need sent: item description, route, date, value.
- STEP 2 -- BootHop matches them with a Booter travelling on the same route.
- STEP 3 -- Both agree to the delivery. Hooper pays into secure escrow.
- STEP 4 -- Item is checked by the Booter (inspection), declared for customs, and collected.
- STEP 5 -- Booter travels and delivers the item. A QR code on the package confirms handover.
- STEP 6 -- Both parties confirm receipt. Payment is released. Ratings are left.

WHAT IS LIVE ON THE WEBSITE TODAY

Everything listed below is fully built and working on www.boothop.com right now:

- Full registration and login system (email OTP -- no passwords to forget).
- Live journey marketplace -- travellers post their trips, senders browse and match.
- Delivery request creation -- senders describe their item and it goes live on the platform.
- Secure payment and escrow -- money is held safely until delivery is confirmed.
- In-app messaging -- sender and carrier chat inside BootHop (not on WhatsApp).
- Live parcel tracking -- senders can watch their delivery on a map in real time.
- KYC identity checks -- Stripe Identity verifies carriers before they can carry goods.
- Customs declaration system -- senders declare what they are sending for compliance.
- AI Safety Assistant -- anyone can check if an item is allowed on a route before sending.
- Compliance engine -- items are automatically scanned against customs rules.
- QR code seal and delivery pin -- proves physical handover at both ends.
- Ratings and reviews -- both parties rate each other after every delivery.
- Blog and SEO content -- articles on customs, shipping tips, and business delivery.
- Help centre, FAQ, terms, privacy policy, and carrier agreement -- all published.
- WhatsApp quick-contact and full contact form.

SERVICES AVAILABLE ON BOOTHOP.COM

BootHop offers three groups of service:

1. PEER-TO-PEER DELIVERY (CORE SERVICE)

Standard P2P Delivery

For: Individual senders and travellers

Any individual can post a delivery request or a travel journey. The platform matches them automatically, handles payment, and guides both parties through the full delivery process.

International Delivery

For: Individuals sending abroad

BootHop handles the complexity of cross-border delivery: customs declarations, prohibited items checks, duty guidance, and carrier KYC. Popular routes include UK to Nigeria, UK to Ghana, UK to Jamaica and across Europe.

AI Safety Check

For: Anyone -- free to use, no login needed

Before sending anything, users can visit [boothop.com/ai-check](#) and type what they want to send. The AI checks customs rules, airline restrictions, and BootHop policy in seconds and tells them if it is allowed, restricted, or prohibited.

2. BUSINESS PORTAL (B2B SERVICE)

Business Standard

For: Small and medium businesses

Businesses can create an account on the BootHop Business Portal and post delivery jobs. They access the same carrier network as individuals but with a business dashboard, invoice downloads, and volume tracking.

Business Express

For: Businesses needing urgent delivery

Same-day and next-available-flight delivery for urgent business items. Targeted at businesses that need something moved fast -- documents, samples, equipment -- without using expensive courier services.

Priority Partner

For: Established businesses with regular volume

Premium B2B tier with SLA guarantees, a dedicated account manager, priority carrier matching, and a dedicated portal with full reporting. Businesses pay a subscription fee for this tier.

Carrier Network (B2B)

For: Independent carriers and logistics companies

Carriers and logistics companies can join the BootHop Business Carrier Network to receive regular business delivery jobs. They get access to a separate carrier portal and are paid per confirmed delivery.

3. SPECIALIST & ADD-ON SERVICES

Customs Duty Calculator

For: All users

A free tool on the website that estimates import duty and tax for common item categories on popular routes. Helps senders know what to expect at the border.

KYC Verification

For: All carriers (mandatory)

Every carrier is identity-verified using Stripe Identity before they can accept their first delivery. This protects senders and keeps the platform safe.

BFI Flight Intelligence (Internal)

For: BootHop team only

An internal dashboard that monitors all live journeys, carrier locations, flight data, compliance alerts, and platform analytics. The

team uses this to manage operations day-to-day.

WHERE WE ARE AS A BUSINESS

BootHop launched 4 months ago and is generating early revenue -- approximately GBP 500 per month at this stage. The platform is fully built and live. We are now focused on growing the number of users on both sides -- more Hoopers posting requests and more Booters posting their travel plans.

- Website: www.boothop.com -- live and taking real bookings.
- Team: 3 co-founders. Oluwatoyin (tech and product), Omobola (procurement and ops), Dotun (systems and customs).
- Revenue: Early stage -- GBP 500/month. Growing through word of mouth and social.
- Geography: UK-based, serving international routes. Strongest demand on UK-Nigeria corridor.
- Registered: BootHop Ltd -- registered in England and Wales.
- Funding: Bootstrapped. Actively applying for accelerator programmes including gener8tor Wisconsin.

WHAT MAKES US DIFFERENT

- We are not a courier. We match real people who are already travelling -- no vans, no depots.
- Our AI safety check is unique -- no other P2P platform checks items against customs rules before sending.
- We handle the compliance and paperwork that makes international delivery complicated for individuals.
- We serve corridors that traditional couriers either ignore or charge a fortune for (e.g. UK to Nigeria).
- Both the sender and carrier are verified, rated, and protected by escrow payment.

WHAT IS COMING NEXT

- Mobile app -- boothop-mobile is already in development alongside the website.
- More routes -- expanding beyond UK to cover Nigeria, Ghana, Jamaica, and diaspora corridors.
- Business growth -- onboarding more Priority Partners and building the B2B carrier network.
- Marketing push -- social content, influencer partnerships, and referral programme.
- Accelerator funding -- if selected for gener8tor Wisconsin, this accelerates everything.

YOUR ROLES AS CO-FOUNDERS

Each of you brings something the team needs:

OMOBOLA FAMUTIMI -- Over 20 years in procurement. Your expertise helps BootHop manage carrier relationships, vet business clients, and build the B2B carrier network. You understand supply chain and how to manage people at scale.

DOTUN ASEKUN -- Over 20 years in systems testing and customs systems. Your knowledge of customs processes is directly embedded in how BootHop checks items and guides users through declarations. You help us stay compliant and trustworthy.

Together with Oluwatoyin's 27 years of system development across banking and supply chain, we have the right team to build this properly.
