 - Azure / REST Integrations
- Agile / Scrum / Waterfall
 - SDLC / DevOps / ITIL
 - Offshore Team Leadership
 - Incident & Production Support
 - Banking System Integration
 - Customs Declaration Systems
 - Aviation Hub Systems
 - Product Architecture & Design

PROFESSIONAL EXPERIENCE

- BootHop Ltd

Nottingham, United Kingdom

2024 - Present

Founder & CEO / Full-Stack Architect

- Founded and built BootHop (www.boothop.com) -- a live, peer-to-peer delivery marketplace connecting senders with travelers to carry goods for a fee, with KYC, escrow payments, and dispute resolution built in.
 - Architected and delivered the entire platform solo using Next.js 16, TypeScript, Supabase (PostgreSQL), Tailwind CSS 4, Stripe Identity, and Resend -- deployed on Vercel with automated cron operations.
 - Implemented full business logic: anonymous intent matching, two-sided KYC, escrow payment model, content-filtered in-app messaging, admin-controlled fund release, and dispute evidence system.
 - Built a separate B2B business portal for commercial delivery clients with its own auth, compliance checks, and carrier assignment workflows.
 - Platform generating revenue within 4 months of launch, with automated matching engine, social content pipeline (TikTok/Instagram), and active user base in UK diaspora corridors.
- OTB Midas Ltd / Target Group

Cardiff, United Kingdom

June 2022 - Present

Senior IBM i Technical Lead / AS400 Lead Associate

- Subject Matter Expert for the CENTRAC Loan Management platform supporting 60-80 UK banking institutions.
 - Lead IBM i development and application support across RPGLE, SQLRPGLE, CLLE and Azure integrated environments.
 - Manage offshore and onshore support teams ensuring SLA compliance and operational stability.
 - Deliver banking system integrations and process improvements for Barclays, Credit Suisse and Morgan Stanley.
 - Drive Agile delivery, governance reviews and stakeholder engagement across the programme.
- UBS

London, United Kingdom

August 2023 - June 2025

Senior IBM i Consultant / AS400 Lead Associate

- Supported critical IBM i banking applications within a highly regulated financial environment.
 - Participated in the Credit Suisse mortgage platform integration programme following the UBS acquisition.
 - Developed and enhanced RPGLE, SQLRPGLE and DB2 solutions supporting mortgage and banking operations.
 - Worked on SWIFT settlement messaging including MT544 and MT546 integrations.

Thermo Fisher Scientific

Loughborough, United Kingdom

IBM i Developer

November 2021 - June 2023

- Developed and enhanced IBM i applications using RPGLE, SQLRPGLE and CLLE.
- Supported Customs Declaration Systems (CDS) and supply chain integration platforms.
- Delivered system optimisation initiatives improving operational performance.
- Worked with MQ messaging, Jenkins deployment pipelines and Jira-based delivery processes.

AGCO

Coventry, United Kingdom

Senior IBM i Engineer

April 2021 - August 2021

- Investigated and resolved pricing, inventory and manufacturing system issues.
- Delivered custom reporting and operational analytics solutions.
- Improved reliability and maintainability of IBM i applications through code reviews and health assessments.

Walgreens Boots Alliance

Nottingham, United Kingdom

AS400 Lead Consultant

April 2016 - April 2021

- Led IBM i application modernisation and decommissioning projects across multiple business functions.
- Analysed RPGLE applications, dependencies and integration points for migration planning.
- Managed integration with Java, .NET and external enterprise systems.
- Supervised offshore development teams and coordinated Agile delivery activities.

VF Corporation

Prague, Czech Republic

Analyst Programmer

August 2014 - March 2016

- Supported warehouse management, financial systems and supply chain platforms.
- Developed enhancements to JBA financial applications and WMS reporting platforms.
- Delivered inventory reconciliation and KPI reporting systems.

JPMorgan Chase

Glasgow, United Kingdom

IBM i Consultant

- Supported GMI banking systems and regulatory / financial system updates.
- Participated in Turnover to Aldon migration activities.

DHL Aviation

United Kingdom / Belgium / Germany

Analyst Programmer & IT Development Manager

February 2006 - March 2014

- Developed aviation and logistics systems using RPG, CLLE, SQL and DB2 across international hubs.
- Participated in the development of DHL Aviation Hub Systems (AHS).
- Designed and supported MQ-based integrations between aviation platforms and customs systems.
- Supported Track & Trace solutions and Customs Declaration processing.
- Led migration activities from Turnover to Aldon and managed cross-border delivery teams.

KEY ACHIEVEMENTS

- Founded BoothHop -- a live, revenue-generating P2P delivery marketplace built and launched in under 4 months.
- Delivered Credit Suisse mortgage integration support for UBS following major financial acquisition.
- Subject Matter Expert for CENTRAC banking systems used by 60-80 UK banking institutions.
- Designed and built MQ-integrated aviation and customs platforms for DHL Aviation across 3 countries.
- Led multiple IBM i modernisation and migration programmes across FTSE 100 and global organisations.
- Successfully managed offshore development and support teams across multiple international programmes.
- Built enterprise integration solutions using RPGLE, REST APIs, JSON, XML, SWIFT and MQ technologies.
